

The diagram shows a rectangular structure. The top portion consists of a horizontal row of six equal-sized squares. Below this row, on the right side, is a circular feature. The circle is positioned such that its center is aligned with the vertical line between the fourth and fifth squares from the left. The circle's diameter is equal to the height of one of the squares in the row above it. The rest of the structure below the squares and to the left of the circle is a solid rectangular block.
